

DIGITAL VAULT

VOL.1

DVault Coin Distribution and PreSale

DVAULT PreSale

The DigitalVault PreSale will pre-sell until the cash flow for the DigitalVault system, further research and development and overall commercial operations is positive.

PreSale token organizers will 'freeze' 15% of the remaining tokens for 18 months, gradually launching them in the cryptocurrency market to support the future development of Digitalvault in the future.

As Digitalvault delivers products and services to more and more potential customers, the demand for DVAULT tokens will ultimately increase and as a result, the value will increase.

Digitalvault focuses on increasing the value of DVAULT coins by providing products and services that support mass adoption as quickly and efficiently as possible.

Name

DigitalVault

Symbol

DVault

Total Supply

8,000,000.000000000DVault

Summary

issuing DigitalVault coins based on the decentralized Ethereum standard smart contract ERC20 called Dvault token

- ① to blockchain enthusiasts
 - ② investors who want to participate in the "future of cyber defense of cryptocurrency and data"
 - ③ members of the global crypto network
-

DVAULT tokens are valid indefinitely and are the property of each holder according to predefined criteria and event occurrences and specific target conditions.

DVAULT tokens will be distributed in proportion to the amount paid by participants in the pre-sale process according to the terms and conditions.

A single **DVAULT token** at the start of presale is worth \$10USD.

DigitalVault Technologies is a registered subsidiary of Teracon Corporation in South Korea and you can find the relevant certification documents on the company website.

The precise distribution of DVAULT tokens for marketing campaigns is managed and regularly adjusted by pre-sales organizers, but does not increase in excess of 2% of the total DVault tokens issued under any circumstances.

PreSale Round 1

8% : to the community with options as well as investors and private buyers, etc.

PreSale Round 2

12% : to the companies and non-profit organizations that can contribute to DigitalVault ecosystem.

July to September

2020

Private sale of OTC and DVAULT PreSale

Pre-sales to companies and non-profit organizations that can actively contribute to the "future of cryptocurrency and data cyber defense" such as Digital Vault partners, strategic financial investors, and angel investors.

PreSale Round 3

10% : to the companies and non-profit organizations that can contribute to via OTC as well as a private Blockdeal

September to December

2020

Private sale of OTC and DVAULT PreSale

DigitalVault's cyber defense data system-the world's first platform launch and the launch of public sale of technology to organizations, institutions, corporations and individuals.

We take steps to launch according to the business roadmap in consideration of the dominant market development.

Use of PreSale funds

The full development of DigitalVault will be achieved upon completion of the token sale.

Nevertheless, we plan to launch DigitalVault basics including marketing, public relations, investor relations, preparation, and more beneficial ways for technical interaction with the market.

PreSale operation *by far the most effective and cheapest model*

PreSale allows participants to directly enter their success.
Contribute to the company and directly affect the return on donations.

① Acceptance of ideas

② Participate in an open dialogue

③ Participation in business

Reward

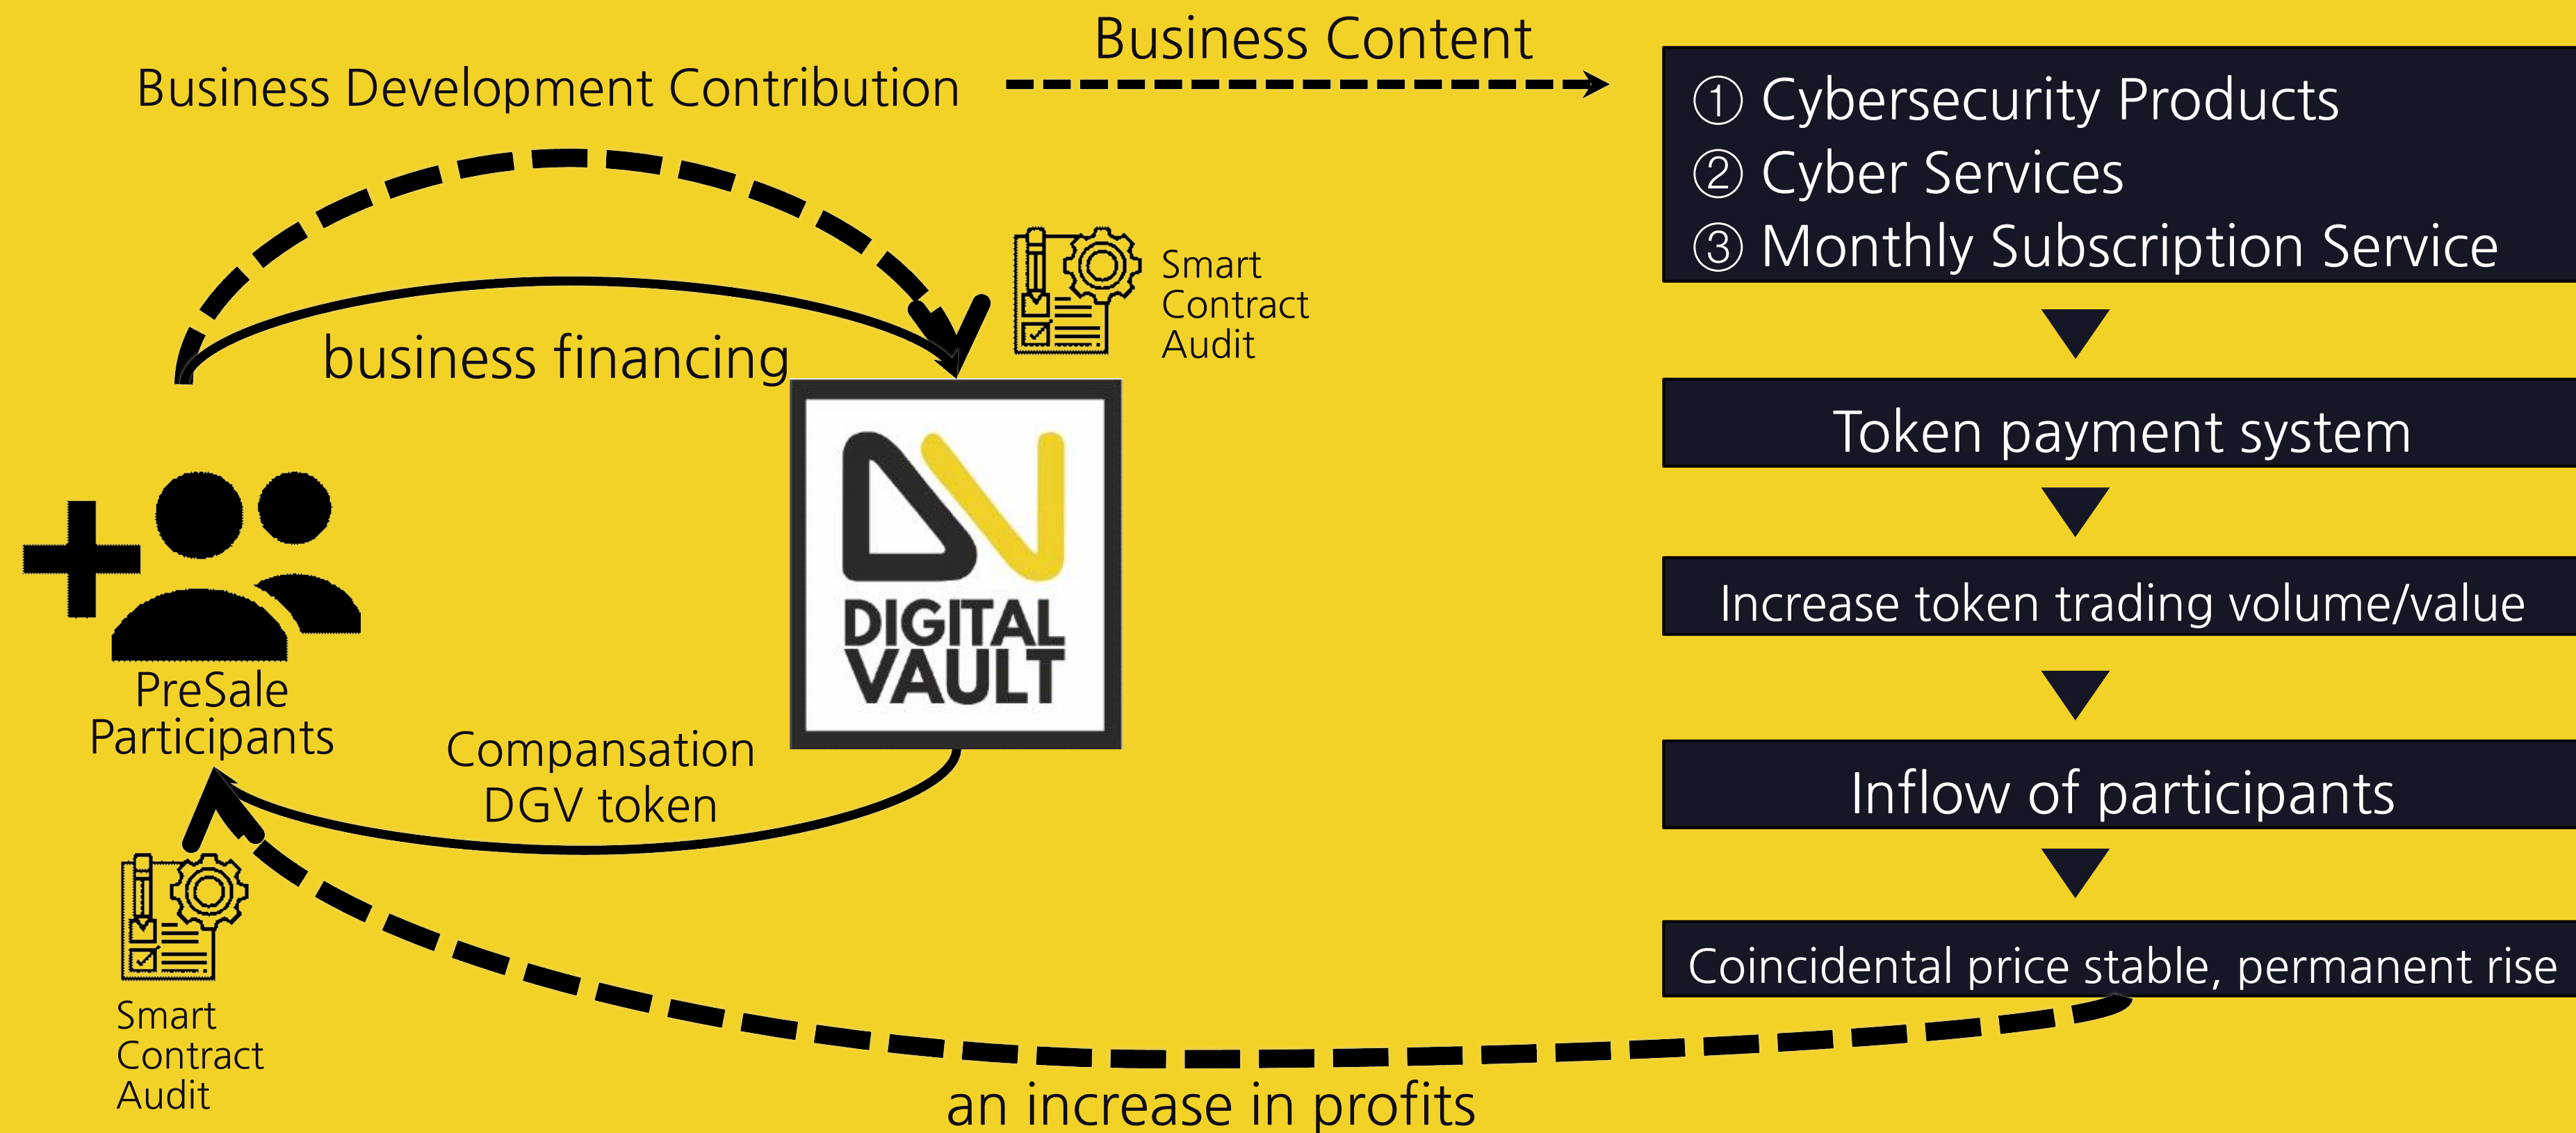

- ① DigitalVault's co-founders
 - ② early investors
 - ③ executive managers
- receive DVAULT tokens for up to 9% of the total amount of royalties.

You will receive a continuous personal guarantee through the number of tokens actually implemented, thereby maintaining a constant interest in the success of tokens during and after token sale.

by a decentralized blockchain protocol.

The total
DVAULT
Quantity

8,000,000

Constant demand

DVAULT tokens are the fuel for processing DigitalVault transactions.
DVAULT tokens are required for every transaction or service within the DigitalVault ecosystem.

Introduction to PreSale

We will revolutionize cybersecurity in the long run.

In the next few decades,
Most cryptocurrencies on the exchange are now lower in price than the initial coins.

The offer price and part of it was removed from the transaction.

This phenomenon
never occurs in DVAULT Coin.

Introduction to PreSale

- ① Supply restriction
- ② DigitalVault Cyber security services

Digital Coins are used for payment of cyber defense services by DVAULT Coins holders within the DigitalVault system.

Due to token supply restrictions and DigitalVault cyber security services.

Due to the increase in demand, the token price will experience a permanent increase

DigitalVault is a coin for long-term investors.

DigitalVault will become the leading cryptocurrency commerce and data storage solutions company in the next few years.
